

### Lenten Reborn Card NET (PCIe Win10) Edition

Basic spec	Version	NET
	Expansion Slot	PCI Express x 1
	Hard Drive Support	IDE / EIDE / ATA66,100,133 / SATA, SSD
	PCIe Card Size	30mm X 33 mm
	Computer Requirements	Pentium III and above compatible PC
	Support OS	Win XP/ Win7/ Win8/ Linux / Win10
	Support Plug and Play	Re-partition is not necessary
OS protection & recovery	Installation Option	Express / Custom / Network Installations
	Hard Drive Size	Support HDD 2TB MBR partition
	Instant Recovery for the OS	Support Win XP/ Win7 (32/64 bit)/ Win8 (32/64 bit), Win10 (32/64 bit) for instant recovery
	Backup Recovery for the OS	Support all The Known Systems for backup recovery
	L-CACHE Technology Support	Apply true 32 bits kernel technology. Support UDMA 66/100
	S-DATA Technology Support	Smart detecting the free space with dynamic technology
	Multiple Boot Partition	Support 48 System Partitions in one Hard Disk
	Specified Data Partition	Support 3 Data Partitions
	Password Control	Password for Administration/ System Partition/ User / Backup /Restore can be setup separately
	Switching Backup Mode Selection	Switching from Backup Restore to Instant Restore Mode
	Default Boot-up Selection	Setup a preferred boot-up partition
	Lock Boot Partitions	Setup and Lock a preferred boot up partition
	Auto Startup Delay Selection	1 to 99 sec can be setup for boot-up time
	Hard Disk Clone	Support 1 to 7 HDD Cloning Simultaneously
	Preset Auto restore Boot Partition	Restore period for Every Reboot/ Daily/ Weekly/ Monthly/ Specified Date can be setup
	Block Booting Media Option	By BIOS/ C only
	Protection Against PCIe Card Lost	A warning will be given when the card cannot be found
	Auto clear Data Partition	Every Rebooting/ Daily/ Weekly/ Monthly/ Specified Date
	Title Menu Setting	A preferred title can be added
	Upgrade	Upgrade driver by CD or Network
Uninstall Card	OS will remain after uninstall when installed by Express Install	
Hardware change detection	Yes	
Support Windows KMS	Support Microsoft on-line registration tool for Campus software service	

	Restore Mode smart checking	Auto enable or disable Windows update and defrag by smart checking the restore mode.
	Support 4K alignment	Support 4K alignment rule to improve the performance.
	GPT/MBR Conversion program	Provide GPT/MBR converting program to enhance the compatibility.
	Mode Manager	Provide [Mode Manager] in Windows system tray to easy-switch mode
	Buffer Size	Up to 8GB buffer can be setup to extend usage time
NET Clone	Network Cloning without OS	NetCopy with PXE 2.x, (Clone the entire HDD/ Partition/ Parameters)
	Auto fix IP/Computer name	Auto fix IP/Computer name in WinXP/Win7/Win8/Win10 after cloning
	Differential clone	Performance won't be affected even after multi-time use. Powerful Smart Differential Clone function.
	1GB transmitting speed	Support 1GB network card transmitting speed to speed up Network clone.
	Support Non-OS network copy	Non-OS is required for both sending and receiving PC when using NETClone option.
	Power management	Add [Power management] option in NETClone to remote restart or power off the receiving PC without entering OS.
	Support different size HDD Clone	Support NET Clone between different hard disk size. (clone from smaller HDD to bigger HDD)
	Support Multicast packet	Add Multicast packet selection in NETClone to send data.
Remote Console	Remote Management Program	Remote Monitor/Control Remote IE Lock Remote Keyboard/Mouse Lock Remote Message Sending Remote Reboot/Shutdown Remote Command Executing Remote backup/restore command or assign boot-up partition Remote monitoring the client PC's desktop in Windows Remote Scheduling Remote Recovery Mode Switching Remote checking the client PC's buffer status. Remote checking the client PC's restore mode and OS Remote setup Net Card Parameter Remote File Sending/Executing
